

Incident XP

one platform to analyze incidents

From incidents to LFI: IncidentXP June 21st 2018 - Leidschendam

Discover the benefits of IncidentXP and learn how this software tool can help you optimize your learning from Incidents (LFI). During the upcoming workshop, you will not only be introduced to the Tripod Beta method for incident analysis but you will also be informed about all valuable features and functionality that allow you to conduct a thorough investigation and analysis. We encourage current Investigator 3 users to join this workshop and evaluate this alternative software tool, Investigator 3 files can be easily converted and stored in IncidentXP.

Take your investigation and analysis one step further with IncidentXP – sign up today!
